

means for integrating the formatted user image data with the defined portions of the visual presentation data to provide integrated image data;

means for providing an integrated visual presentation responsive to the integrated image data.--

530 D 147
--50. A method of integration of an image from a secondary source into a predefined image source, the method comprising the steps of:

providing a presentation output from the image source;

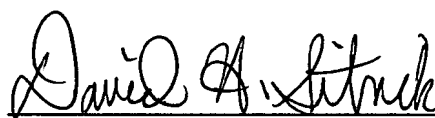

providing a user image from the secondary source; and

providing a presentation architecture having means that integrate and utilize the user image from the secondary source to participate with predefined associative actions in the presentation output as an extra actor.--

REMARKS

By this Preliminary Amendment, claim 1 has been amended to more clearly set forth Applicant's claimed invention. Newly added dependent claim 38 recovers a portion of what was removed from claim 1 by this Preliminary Amendment. Claims 27, 28, and 29 have been amended to correct typographical and grammatical errors. Newly added dependent claim 39 further characterizes the integration signal of claim 13. Newly added claims 40-50 correspond to subject matter originally disclosed in the parent application. No new matter has been added. Consideration is respectfully requested.

Respectfully submitted,

David H. Sitrick
